

# BUSINESS CENTRAL SECURITY PACKS

**ONE-OFF, FIXED-PRICE, FIXED SCOPE**

BY CHOOSING BUSINESS CENTRAL YOU ARE ALREADY LEVERAGING THE POWER OF MICROSOFT'S CLOUD, GAINING ACCESS TO ITS POWER, SCALE AND CONTROL. IT'S BUILT ON THE SAME FOUNDATIONS AS 365 SO USERS BENEFIT FROM A SINGLE SIGN ON, USING DETAILS THEY'RE ALREADY FAMILIAR WITH AND USE DAILY.

## NOW IS THE TIME TO MAKE SURE ALL YOUR MICROSOFT SERVICES ARE SECURE

By looking to add Microsoft's Enterprise Mobility + Security (EMS), you benefit even further by ensuring that not only is the data within Business Central secure and access controlled, but also from protecting all your businesses commercially sensitive data that's stored outside of the ERP system.

Think emails to clients, Office documents containing proposals and job costings etc. By adding EMS you ensure that you've got the best systems controlling access and keeping your business data safe, all whilst being seamless to your users.

Bam Boom Cloud have made things simple by creating two fixed-price, fixed-scope\* Business Central Security Packs which deliver enhanced Microsoft security to help protect your business.

### BUSINESS CENTRAL ADVANCED SECURITY PACK 1 – £1,900

Our Business Central Advanced Security Pack 1 makes managing passwords easy and ensures that everyone has a secure identity for 365. You will gain control of not only who can access your data, but from where as well as stopping malicious attempts and breaches from geographic locations that you do not permit.

- Use Multi-Factor Authentication (MFA) for roles with access to sensitive data
- Enable self-service password resets

### BUSINESS CENTRAL ADVANCED SECURITY PACK 2 - £2,850

Our Business Central Advanced Security Pack 2 helps you identify Personally Identifiable Information (PII) as well as sensitive business data. Once identified you can track and control where this data can be stored and how its transmitted including controlled print, sharing and editing.

- Use Data Loss Prevention (DLP) to stop sensitive emails leaving your business
- Use Azure Information Protection to maintain control over documents you share. Prevent printing, editing and even email forwarding
